12/27/67

Dear Miss Anthony,

As I've spent more time than usual away from home recently, I'm further than ever behind and haven't worked my way out from under the accumulated letters of my correspondents. Please forgive my brevity.

I like your article about the pictures but it's to me very much for two reasons: 1) I like the Thompson book; it is an effort to get the Government off the hook by presenting criticism while supporting its major conclusions. Hence I would very willingly have a "cuckoo" in my files. Also, a friend is continuing my work on the pictures, and I'd like to give this to him also. If you can find the time, would you expand what you wrote 12/20, including citations?

I agree with your comment that people see only what they want to see.

The thing of those you said that is most interesting is that it wasn't Vergis. There were errors in what Holland said, und-rendable errors but nonetheless errors. It is no doubt to see what he said he did when he testified to people, etc.

Your personal missives are becoming no less mysterious with the passage of time.

Have you gotten all the information you can in your connection and what he is like, who she associates with (whether men or women), etc. If you were unconscious, you'd hardly know what he wanted or didn't...it does seem consistent with some kind of freakup also... My opinion if male homosexuals has always been that they hate women. (fitness/births" styles)

Have a good year.

Sincerely,
